Letter

As Chairman of the Scholarships and Awards Committee of the Council of the Faculty of Applied Science and Engineering, I would like to announce that the 3T5 Second Mile Engineer Award for the 1987-88 Session has been awarded to Mr. Wayne Charles McPhee, a student in fourth year Engineering Science.

extracurricular contributions and accomplishments during tenure in the university are judged to be outstanding. The Award Committee was encouraged by the response from excellent applicants from all engineering departments.

Mr. McPhee received this award at the 3T5 Second Mile Award Dinner at Hart House on February 10, 1988.

Sincerely yours,

This award is given annually to the fourth year engineering student whose T. C. Kenney Chairman Scholarships and Awards Committee

Our Engineering Liaison Coordinator.

What does he do?

by Sushant Verma

One of the issues in the upcoming referendum is whether or not we need an Engineering Liaison Coordinator. Many students don't know what the E.L.C. does and thus cannot make an informed decision. To remedy this situation and gain more information, I recently spoke with Greg Gerrie, our Engineering Liaison Coordinator who has been with us since June of 1987.

The Marketing of U of T Engineers to prospective employers is the primary goal of Engineering Liaison. Greg's initial contact with a company is by letter, followed up by phone calls and maybe even a visit to an interested firm; the purpose being to sell the abilities of Engineers. One of the sources of prospective employers was the summer job survey completed by students early in the year. From this, Greg

obtained the names of over 200 companies. Since June of 1987, he has contacted over 800 prospective employers. All this means we should see more summer, part-time, PEY, and permanent job postings.

Greg was also responsible for the organization of Engineering Career Day, the summer job seminar, and the extern program. All three were very successful.

Engineering Liaison news is posted on a board across from SF1105 and special articles can sometimes be found in the cannon. More information can be obtained from the recently distributed newsletter.

Greg enjoys speaking to students at seminars and tries to get feedback through various surveys. He is looking forward to a successful referendum and I wish him the best of luck.

Engineering Liaison

Greeting from the office of Engineering Liaison. I hope you all had a great Reading Week and that you spent at least some of the time in search of a summer or full time job. If the skiing, sun and relaxing just happened to be a little higher on your agenda, fear not! There are still some companies hiring for permanent and summer positions through the On-Campus programme. In the Summer/Part time area, there are already 20 summer positions posted requiring Engineering students.

In discussion with Kathy Graham from the Summer/Part-time service, I was informed that the major influx of job listings at the Career Centre occur in April and May. (See the article on statistics to get an idea of the number of positions which will be available.)

17 Month Statistical Summary

Recently the office completed an extensive statistical evaluation covering October 1, 1985 to March 31, 1987. The following is a synopsis of the results of the evaluation.

- 1) In the first year and a half, a total of 2001 Engineering firms were contacted by Engineering Liaison.
- 2) In the same first year, a total of 579 positions were listed by firms contacted by Liaison.
- 3) In the first year, total Permanent Employment Service listings increased from 393 to 503. (a 28% rise)
- 4) In the first year On-Campus listings increased from 68 to 85 companies. (a 25% increase)
- 5) In the first 6 months, the Engineering Referral Service listed 136 positions and in the second year 267 positions from 235 companies.
- 6) The number of Part-time/Summer positions increased from 677 to 817.

WHAT ELSE HAS ENGINEERING LIAISON GIVEN YOU SINCE ITS INCEPTION?

- Establishment of Company Information Files in the Career Centre
- Articles in The CANNON newspaper
- Engineering Liaison Newsletters
- Engineering Employment Week '87
- Marketing for Engineer for a Day and the Extern Programme
- Summer Job Survey
- Presentations at Club Meetings
- Engineering Career Week '87
- Engineering Career Day '87
- Summer Job Survey '88
- Presentations at EngSoc Meetings
- Presentation at Orientation
- Engineering Liaison Communications Board
- Engineering Summer Jobs Seminar '88

Cosetta Caporella

Acclaimed

Hi, my name is Cosetta Caporella, but you can call me Cosy. I have been acclaimed as your Vice-President Activities for the Engineering Society. This executive officer is responsible for the overseeing of all social and athletic activities of the society, and is thus a member of all standing and special committees.

While with the Faculty of Engineering, I have participated in various committees, developing the essential organizational skills necessary for the job of VP-Activities. Among these are Frosh class rep., Orientation Committee and the newly established Orientation Review Committee.

As VP-Activities I would like to plan events other than

those traditionally run by the society. I hope to liven up Suds with various events such as live amateur bands. So anybody who's into jamming, come and talk to me. I am also interested in developing a liason with the Engineering Athletic Association which in the past has been somewhat of a separate entity from the Engineering Society. I feel confident and very enthusiastic about this position and I want you - the students of the faculty of Engineering - to feel comfortable with the Eng Soc and it's officers. Our doors will always be open so that you can come and speak to us regarding ideas, guidance or anything.

Remember that the ENG SOC is for you.

Brian Broda

Hi, my name is Brian Broda. I am running for the position of Vice President External of the Engineering Society. This is a new position in the EngSoc, but by no means is it going to be an easy one. My responsibilities as VP External would involve overseeing all of the EngSoc committees except Social and Blue & Gold. I would also be responsible for approaching OSAP to arrange a deal which would allow students to get a loan specifically to pay for

a computer from our new Computer Store. In the past I have been extensively in the EngSoc. This past year I represented you as the Treasurer of our Society.

I have also worked on the Skule Handbook as well as the Cannon. On the social side of things I have been a member of the Orientation Committee for the past two years. Many of you should also

recognize me as one of the wild and wonderful staff of Suds and the various Pubs organized by the EngSoc.

Having been involved in the Engineering Society to this extent I believe that I am qualified to represent you as VP External. To this end I would like to take this opportunity to ask for your support in the upcoming elections. Thanks,

Brian Broda

Rob Drascic

Acclaimed

See Rob.
See Rob run
See Rob run for Treasurer.
See Rob catch Treasurer.
See Rob Quarantined.
See Rob get nasty shots.
That's the last time that Rob will catch a Treasurer.
Rob will make a good Treasurer (VP Finance)
Being Treasurer is a fun position.
It involves money.
Do you want to see Rob have fun?
Rob has fun with money.
Rob likes money.
Rob's favourite hobby is spending money
Rob is very good at this.
So let's make Rob happy and make him treasurer.
Rob says thanx since he has now been acclaimed.

You are stuck with him.
Ha Ha Ha !!!
See Rob stop running.
Rob is out of breath.
Rob is also out of room.
See Rob pull out an Eng Soc cheque book.

See Rob write out a cheque to get himself a bigger room.
See the Eng Soc in the Red.
You people are in trouble.

ELECTIONS

What I say:
During my year as V.P. Activities, I have become very involved in the innerworking of the Engineering Society. Most students don't realize the number of things which have to be done when you're dealing with a corporation (In case you didn't know, the Eng Soc is a corporation.) Anyway, in working closely with this year's officers, I have become aware of what needs to be done in the future. Some obvious priorities are the Computer Store arrangements and lobbying the government for OSAP computer loans. Another idea which has been kicking around for a few weeks is the investment by both the Eng Soc and the faculty in a room full of networked P.C.'s for students. There is also a great need to finish 'what Wayne started' this year, including our Constitutional review and an Office Procedures Manual. There will be work to

be done in reorganizing the committees (and the office) to fit in with the new Vice President structure. Lastly, my pet project: getting the SND's (sanitary napkin dispensers) fixed!!

Francis Uy

Hi, I'm Francis Uy and I am running for the position of V.P. External (formerly V.P. Administration).

Through the years, I have always been involved in numerous extracurricular activities. Last year, I was the President of the Philippine-Canadian Students Association, the Premier of the Central Ontario Regional Parliament, and was on the Communications staff of the Youth Parliament of Canada. This year, I am the President of the U of T Young Parliamentarians, and an Executive Cabinet Minister for the 1988 Ontario Youth Parliament.

I am currently the Faculty Rep for the Industrial 8T9. In addition, as Communications Chairman for EngSoc, I oversee the

enthusiastic and run for this position.
knowledgeable student. I Peter
feel that I am qualified to

Peter Noble
Acclaimed

The position of Secretary of the Engineering Society involves the recording of meetings as well as the organization of the Engineering Society's files, in addition to numerous mundane but essential tasks. I am in third year Chemical Engineering, and in my three years here I have been involved with many aspects of the Engineering Society.

I have been a member of The Lady Godiva Marching Band since first year and am currently drum major. I am also an activist for the eng. soc. so I am involved with its records. I was also a second year rep. and junior treasurer for the Chem. Club.

I am aware of all the duties required by the secretary, it requires an

production of The Cannon, The Toike Oike, and the Skulebook. I represented EngSoc at the Regional Engineering Student Societies Association (RESSA), as well as the Engineering Student Societies Council of Ontario (ESSCO).

V.P. External promises to be a demanding position. However, I am confident that I have the drive and skills necessary to do a good job. The organizational and leadership skills that I have acquired through my numerous activities will prove to be invaluable.

I am fully aware of the commitment that is needed for this post. Therefore, if elected, I will cut back on all my other activities in order to focus on this position. I am prepared to invest a large amount of time, effort and enthusiasm.

I believe that I am the candidate best able to represent your views and ideas. I am thoroughly familiar and comfortable with all aspects of the position. As members of the Society, you have the power to shape the future of Skule. Take a moment, think about it, and vote for me. Thank you for your support.

Peter Noble

Engineering Faculty to build 'Pratt Building'

The Faculty of Engineering has received word from Lucille Pratt, the widow of D.Lorne Pratt, that the hulk of his estate will be given to the faculty. It was originally specified in Mr. Pratt's will that the funds would remain with Mrs. Pratt until she had passed away. However, Mrs. Pratt feels that the money should be put to good use now and has generously allowed the faculty access to the funds.

Mr. Pratt was from the class of 2T2 and graduated from Civil Engineering at University of Toronto. He enjoyed a successful career in the mining industry and he died at the age of 70 in 1969.

The donation will be used to create a three story

MECH 9T0

TTC Student Metropass 4 for 3

The 'Better Way'? For most of us it's probably the only way. Well, the TTC hasn't really tried to improve their reputation with the public. But this isn't supposed to be an article on public opinions of TTC delays and other mishaps.

Quite the opposite, the TTC might finally be showing that they have a heart, at least to students. Students in post-secondary institutions already face financial difficulties without baying to worry about the approximate sum of \$360 needed to ride the TTC for the normal 8 month school year.

There is a proposal, which has existed for five years, that would create a student pass. The student pass would cover one school term (4 months); therefore,

expansion of the Metallurgy Building (the one story building attached to the Wallberg Building) with a bridge to the Sir Sandford Fleming Building. It will be called the Pratt Building and has an estimated cost of \$9.1 million. The expansion will house parts of the Electrical and Computer Science departments as well as the Ontario Centre for Information Technology (a U of T and Waterloo joint project).

Architects are now being retained and it is hoped that construction will be underway by the Fall of this year. Completion is scheduled for April of 1989.

Fourth Year Pledge

To All Fourth Year Students Hear Ye! Hear Ye! Hear Ye!

The University has just announced the grand prize in the Leaving Class Pledge Contest (or as they call it, the Graduating Student Gift Contest!) It is TWO (count 'em) round trip tickets to London Ball.

(England, not Ontario), good until the end of 1988. To qualify for the draw, all you have to do is fill out a pledge card and return it to your club chairman by March 4th. The draw will

be held in mid-March.

As well, the Engineering Alumni Association will donate two cases of bubbly - one to the class that has the highest per capita pledge and one to the class with the biggest rate of participation. Both will be delivered before the Grad

supported you while you were here: \$502,000 was given by alumni to Skule in 1987.

While the prizes are interesting and fun, the real issue is your social conscience (yes, you do have one!). Please listen to it closely and carefully - before March 4th.

Keep in mind that pledge cards are not legal contracts. Instead, they are an indication of your willingness to support the students who follow in your footsteps - just as alumni

Good luck to you all,

Malcolm McGrath

Assistant Dean
Alumni Liaison

Alex Rocha

Real Music

The records in this review aren't necessarily new, but since the last record review in the Cannon seems to have predated modern music, I think I'm pretty safe in assuming they haven't been written up before. My own personal tastes range from the flawless offerings of David Sylvian to the world's oldest punk, Iggy Pop, with a lot in between, and I hope to be able to introduce some albums that aren't quite "mainstream". If you want to hear about the latest release from David Lee Roth or you want to know what's hot in rap music, don't waste my time or yours; you can tune in one of those bland AM stations, fill yourself with generic funk and ignore these reviews.

Sinead O'Connor
The Lion and
the Cobra

I first heard this album two months ago and was spellbound. Just barely twenty years old, Sinead has released one of the most unforgettable debut albums I have played; she is not, however, new to the music scene, having worked with the Colourfield and The Edge. I will admit that I do not usually think much of female vocalists.

With the exception of Annie Lennox's distinctive voice, I find the Madonnas, Belindas and Bangles of the world to be little more than video filler. But this is a voice that both seduces me and chills me to the bone. The sound is reminiscent of early Kate Bush, with a more layered texture. This is emotion that stays with you long after the song is over, and it is backed up with exceptional music that ranges from haunting strings (on Troy) to raw, heavy guitar work on some of the more abrasive tracks. With lyrics that intertwine

illusion and allusion, this is an album that reveals more and more with each play. As music written by someone still experiencing life on our level, the songs of discovery and uneasiness are a welcome change from mindless dance floor pop.

Red Lorry, Yellow
Lorry
Paint Your Wagon

In the middle of exams, a friend of mine lent me an inconspicuous looking cassette and assured me it was just what I needed. This is THE album to play when you're at wit's end and still have three more hours of quantum physics to plod through. This is good music that is hest played loud, not loud music that is hest not played. This is an album that you can be proud to own (my friend informs me it is nearly impossible to find, so if you do, be proud . . .) The music has the edginess of a man living in hell, the lyrics are simple to the point of being non-existent, and the

action is fast and furious. Put away your namby-pamby Bruce Springsteen and Van Halen. Play something so unique, you'll swear you've had an out-of-body experience (or a frontal lobotomy).

The Razorhacks
Go To Town

Are you tired of the uninspiring flood of electro-pop that has been trying to de-sensitise your ears to real instruments played by real musicians? For quite some time now, I have been searching for a record to fill the acoustic chasm that has developed over the last little while. The Razorhacks, I can proudly say, have filled this gap supremely. Upon this record, there are no electric, electronic or digitised "instruments". It's all real kick-ass music. A double bass, a drum kit, and acoustic guitars dominate, with attacking cow-punk vocals. It's just good plain music that everyone should enjoy and become a part of. Become a "back"-man (or woman). This Toronto band deserves all it can get.

In Review . . .

by Steve Furguson

Concert Scene

Feel it rising
in the cities,
Feel it sweeping
over land,
Over borders,
over frontiers,
Nothing will its
power withstand

The words take on new meaning, foreshadowing the universal appeal of Sting. He is a man that can take an audience of 16,000 and hold them in his hand for almost three hours.

Although I had never seen Sting in concert since he went solo, I knew that I would not be disappointed if his second album, "Bring On the Night" (a live album) was any indication. I have never heard the Gardens sound this good. From the opening bars of "The Lazarus Heart" the band showed itself to be one of the tightest ensemble groups in the business.

Sting blended material from the recent album "... Nothing Like the Sun", "Dream of the Blue Turtles" and his live album, as well as "King of Pain" and "Don't Stand So Close to Me" from his days with the Police.

The audience hung on every word that came from his mouth. Whether he was giving us an impromptu lesson in musical time before "Straight to My Heart" or calling our bluff

when 16,000 cheered at the mention of his first concert at the Horseshoe Tavern in front of fifteen people, the audience loved it. The cat-calls and swooning of the female members of the audience did get rather nauseating, however, especially when it ruined "The Secret Marriage".

After closing the regular set with a version of "Little Wing" that left the audience wondering what had hit them, he returned to field requests.

Apparently many people listened to the Amnesty International concerts, as he played "Roxanne" and "Message In a Bottle" accompanied only by his acoustic guitar and the audience.

The only sore spot of the evening was the behaviour of the hired thugs posing as security guards. They had the nerve to tell us when to sit and when to stand, and being the typically polite audience of the 80's, we did. I was surprised, on more than one occasion, to find that my friends and I were the only ones on the floor dancing to the music while everyone else in our section sat motionless in their seats. What happened to the audience energy of the original Police picnics? Perhaps they were waiting for Sting to tell them to dance.

The Proclaimers
This is the Story

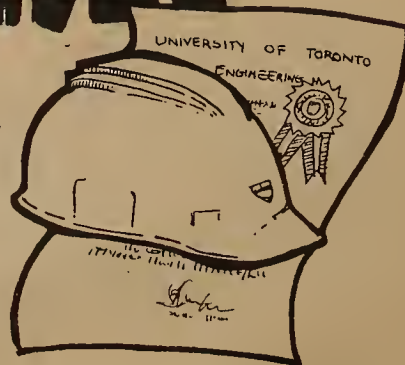

This could be a record for conversational Scottish, but Angus Crook could never be so deep. Two brothers comprise the Proclaimers and they succeed at most songs they try. One can tell they actually enjoyed the recording process, but one hopes that

they won't start taking themselves too seriously too soon. Letter From America stands out as THE cut hut there are many other extremely notable songs as well. If you like earthy music, acoustic instruments and you're a sucker for Scottish accents, this is a grrreat grrreat record for you.

A word from the LeBlanc /Lacy Campaign

Vote I'm sure that
that's a word that's
been screaming at you
from posters as you
walk to and from
classes, and assaulting
you as you run into
one of the many
candidates who've
been swarming across
the campus for the last
several weeks asking
for your support The
question is, why
bother? As a candidate
for SAC President, I'd
like to take the time to
try to answer that
question
I feel that SAC, which
takes about \$50,000 of
Engineering Student's
money, has a duty to
respond to the needs
of the students it was
created to serve. In
order to help SAC
accomplish this goal

Brian Lacy and I have
proposed the following
initiatives, which we're
committed to putting
into effect:
1)Open up the
administrative
services of SAC to the
Eng Soc as well as
other campus groups
This will allow the
Society and others the
use of such facilities as
SAC's laser printer We
feel this is a service
that SAC should be,
and is capable of,
providing.
2)Co-sponsoring
events with college
and faculty councils
and allowing more
events to occur SAC
has the resources, it
should be committing
them
3)Steps have already
been taken to help the

production schedule, in the year ahead I
and cost of the hope, that with your
SAC datebook. The help and support the
SAC directory goal of a more
however, still presents responsive and
a problem This year accessible SAC can be
nearly 20% of all reached It is for this

Can the
Artsies be
saved... and
who really
cares?

A Reply to Alison Louise Bruce (Varsity, 04/02/88)

Engincers are very patient. We have to be, since we are endlessly pum-melled with mind-numbing work. However, there are limits to our endurance of Artsie attempts at sarcasm.

After a long weekend of problem sets and formal lab reports, I stumbled into the Arbor Room on Monday morning to relax before my first class. Then I read page ten of that paper that attempts to be the voice of the campus. In the article, the author states that "...someone could explain to the Engineers, in words of one syllable...". My patience congealed in my coffee. My day was a loss because of the feeling of disgust that permeated my brain.

That was why I decided to mount an expedition into the heart of Artsie intellectual areas to find out their level of communication. I reread old guidebooks to find out where top echelon of Artsie intelligence could be found. Also, I followed the many fashion guides so I would be innocuous as possible.

The first place that was recommended was the University of Victoria (known by plebecites as Vic). I immediately noticed the large number of intellectuals, easily identified by their long hair and large labels on their clothing. The halls buzzed with intellectual conversations. I sidled up to a group and listened carefully, hoping to hear someone revealing the secrets of Kant, or perhaps even Vonnegut.

Can You Bullshit? Tell Tall Tales? Then the Varsity Needs You !!

"Like, well, you know, I really think she likes me because she said she really likes, well, all the groups I do...". Oops. Well, maybe if I try the library.

The library might be the haven for the intellectuals since they wouldn't let me in. Oh well, I can't let one little set back stop this important research. Next is the building with the interesting gargoyles and staircases.

UC. The college described as the last resort for radical-leftist-individualistic-intelligentsia. This was obviously the right place; the building even looks like a place where interesting and smart people would inhabit.

After wandering around the staircases for a few hours, I located a small study room that looked full of intellectual Artsies. However, no one was talking. After an hour of sitting in a chair watching people reading textbooks, I attempted to start a conversation with someone next to me. All my attempts were fruitless until I mentioned I needed a beer.

"Oh. Come on, let's go to Reznikoff's," said the intellectual. Success at last.

I had heard that Reznikoff's was the last bastion of intellectuals but had not believed it. After hours of sitting, I was ready for an in-depth conversation, composed of words containing more than one syllable.

"Please let this moronic Engineer hear a real Artsie-intellectual

dialogue", I whispered under my breath. I was not disappointed. We discussed the current trends in intellectual status symbols. I learned about the relationship of label size to the desirability of the person wearing the clothing, as well as how trendy black clothing is. Enlightenment at last.

I also was told by an intellectual how he had skipped all of his classes, never bought any textbooks, and had still pulled off a remarkable 87%. The Artsie intellectuals are obviously geniuses to be able to accomplish that. The same person also said his parents had already bought him a BMW.

Unfortunately, it looks like this remarkable breed of intellectual is also dying out. We sat for hours in the pub staring at the women dancing with each other. The intellectual complained that he couldn't get a girlfriend even though he had grown his hair.

I left and resolved to set up a fund to help buy the Artsie intellectuals more clothing and accessories so there would always be people who can communicate in words of more than one syllable.

Stephen Dobson

Fellow Engineers:

It's election time...again? And the walls are more poster than brick. There's Eng. Soc. elections and Governing Council elections and SAC Presidential elections, and more. There is one election campaign that doesn't seem to have a lot of momentum considering the nine candidates that are running for the five available positions.

I'm one of those people you might not have seen posters for yet, but that doesn't mean I'm not

interested in winning my seat back again. Last year I was acclaimed to a position on the board, and was primarily involved with the university affairs committee, but also managed to do some odds and ends with the services committee.

Being a SAC rep means, for the most part, attending meetings representing The Professional Faculty of Engineering's Interests, and getting money allocated to appropriate activities, and not to others that don't serve the students' interests.

During my term this year, I had the pleasure of introducing a motion to allocate money to the LGMB, that passed about

Engineering SAC Reps

unanimously. The LGMB was ruled ineligible for Project Aid this year, where previously they had been allocated funds. The board, after debate agreed that the LGMB held a fine tradition of promoting school spirit and Skule(TM) spirits.

Prior to my year in SAC, I was elected as class representative for the Engineering Society.

Anyway...before this gets too long I'll sign off after I remind you there are five positions available for SAC rep, and I'd appreciate it, and hopefully so will you, if you vote for me in the upcoming election on March 9, 10.

Thanks,
Stephen Dobson

Boaz Brickman

Do you know the names of the current Engineering SAC representatives? I don't, and that's why I'm running. While we enjoy poking fun at SAC we must also realize that a significant portion of the SAC coffers is filled by monies contributed by Engineering students. In order to derive the maximum benefit from our contributions, we must have vocal representatives sitting on the Board of Directors. If I am elected to the Board of Directors of SAC to represent ENGINEERING, I shall endeavour to state our position, clearly and concisely, on the many issues which SAC addresses.

Most campaigns are waged on the battle cry "accessibility and communication"; personally I have seen neither this year. Rather than having students go to SAC, our representatives should prepare statements detailing activities and causes which are worthwhile for

Engineers to get involved in. In addition to this, I shall prepare a column for each CANNON outlining current and upcoming SAC sponsored events.

SAC also acts as a lobby group, lobbying the government for additional funding. By participating on the External Commission, I shall lobby for special funding to upgrade our lab facilities. By showing our technical prowess to the government and reminding them yet again that we have to best Engineering program in the country, perhaps additional special funds can be allocated towards upgrading our labs.

We are already recognized as having the most spirit of all campus groups, now let us show the rest of the University Community that we are also concerned with the way this University is run. Strong representation on SAC will demonstrate this.

SCITE ET STENUE

I'm BOAZ BRICKMAN

Shaibal Roy

How well is engineering represented at the S.A.C.? Since I first thought about this issue, I reluctantly realized that the engineering faculty was not at all well represented at the Student's Administrative Council. Let's face it, how many engineering students even know the names of the five current engineering reps at the S.A.C.?

Being amongst the largest and most prolific faculties in the University, as well as the best engineering school in the country, it's about time that we were given our money's-worth from the S.A.C.!!!

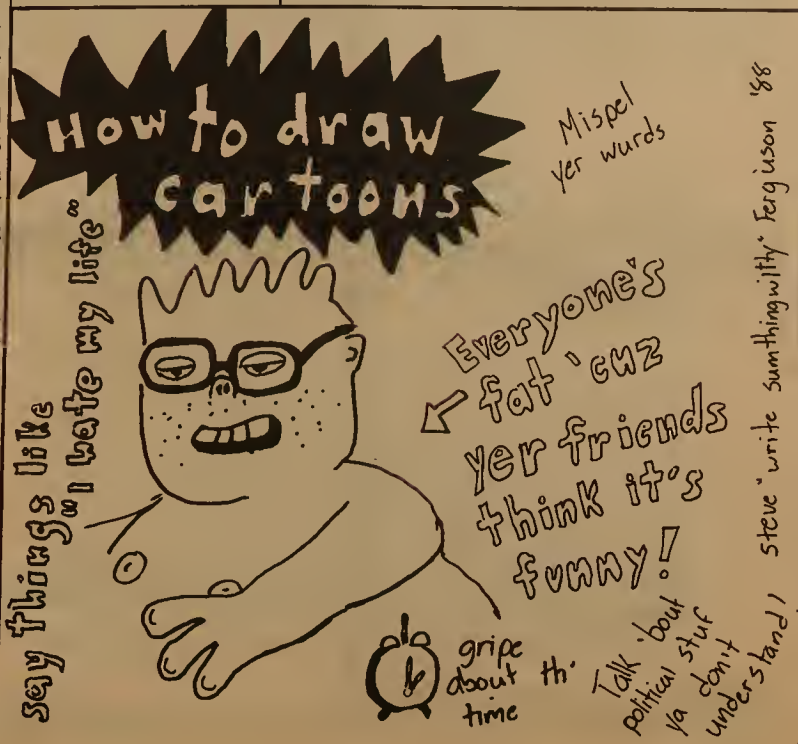

This is the actual role of the S.A.C. representative. If elected to the S.A.C. Board of Directors, I shall endeavour to present in the most effective and efficient manner possible, the many views and opinions of the faculty. To make certain that the faculty is aware of my work, I intend to

prepare a report that will describe in detail the progress that has been made by your representatives in dealing with issues such as the purchasing of more modern lab equipment. This report shall be published in "THE CANNON", where I am an editor. By taking part in the activities of the EXTERNAL SERVICES, and UNIVERSITY AFFAIRS COMMISSIONS, I will establish the authority of this faculty as being second to none. The engineers are the best and brightest people at the UofT; let's make sure that S.A.C. gives us the respect we deserve.

Amnesty International

N.Vera MECH 9T0

On June 12, 1986, a nationwide state of emergency was declared in South Africa, and thousands of arrests soon followed. Though many prisoners were eventually released, they were re-arrested after the state of emergency was reimposed on June 11, 1987.

The state of emergency regulations permit members of the security forces to detain anyone incommunicado without charge or review for 30 days. Then, the Minister of Law and Order may extend the detention indefinitely. The police and security forces are also granted legal immunity for any acts committed during this state of emergency. This is being used as an excuse to abuse the prisoner's rights.

Ndumiso Hilton Gola was arrested in King Williamstown on June 14, 1987, but the reasons for his detention are not known to Amnesty International (AI). He is being held indefinitely in Fort Glamorgan Prison, East London. The National Medical and Dental Association conducted an investigation on the conditions in this prison and has raised some serious concerns about overcrowding, poor food quality, and inadequate medical care. AI is also concerned about reports of torture and ill-treatment of the prisoners.

AI's Group 83, at the

University of Toronto, has taken the case of Ndumiso Hilton Gola under the status of single investigation. He is not considered a prisoner of conscience (POC) because it is not known if he has used or advocated violence. Group 83 has been working on this case since the release of their last POC, Sikumbhizo Albert Magadla, in October 1987. The POC coordinator Marjan Ehsassi has sent two letters to the family of the prisoner but has received no response. It is not known if the family has received the letters or is under political pressure to ignore them.

Group 83 has also started a postcard and letter campaign throughout the campus. The postcards may be picked up at the colleges and the letters are being distributed among professors in hope that the South African government will be impressed by our concern upon receiving them.

Ndumiso Hilton Gola is just one of thousands of prisoners being detained under the state of emergency in South Africa, and just four months before the anniversary of the reimposition of the state of emergency it will be interesting to see if the prisoners will once again be released only to later be re-arrested. If that happens, they can be sure AI will be there to help them.

Computer Store

Just what are these well organized engineers up to? Doesn't knowing that the EAA office has been relocated stir up a few questions? It certainly should.

In the planning for over 6 months and now as reality, is an Engineering Society fully-owned Engineering Computer Store equipped to meet the computing needs of all university students

The planning was by no means hasty in that the final decision to sell Philips' computers has been well researched and best represents the students' needs. Committee Chairman, Kevin Melnyk's primary goals were to supply students with a quality machine and peripheral configuration at minimal cost. The Computer Committee settled not only on excellent quality and low cost for the students, but also on excellent service and support.

Originally, the Computer Committee wished to negotiate the selling of Philips' computers through a third party vendor, such as the Computer Store located in the Koefler Centre. This, however, was deemed not beneficial for the students because in general, high store overheads would result in a large

margin being charged per computer. By operating an Engineering Computer Store in an already established premise, the cost of selling the computers to the students would be held to a minimum.

Thus, the Engineering Computer Store was born

While in Montreal recently, four committee members met with leaders of computer stores to gain some insight into their operations. The two stores in Montreal, COOPOLY and COFIQ presently supply Quebec students with affordable computers and peripherals

In 1984, COOPOLY, a co-op set up by Ecole Polytechnique students, was formed so they could market a good computer at an affordable price. At that time, they also chose the Philips computer for the students. To make the purchase more attractive and easier for students, COOPOLY approached the Quebec Government for student computer loans but was rejected because they were too small an organization. They continued their operation regardless, and sold computer to students at an affordable price. In 1985, six other Quebec universities became involved and subsequently formed COFIQ, which represents seven

engineering schools in total. With this added strength, COFIQ and COOPOLY approached the Government and succeeded in obtaining a student computer loan.

Although COFIQ and COOPOLY split forces in August of 1987, both organizations still supply the student market, with approximate sales of 2000 PCs in 1987 alone. It is hard to imagine what would have happened if U of T didn't take progressive measures to ensure that students may buy affordable PCs and become PC aware before they graduate.

The structure of organization at the Engineering Computer Store will be similar to that of COFIQ and COOPOLY, however, on a smaller scale. Yearly, a vice-president will be elected to the Engineering Society who will oversee the Computer Store operation. To help operate the store, a Computer Committee will also be elected annually so as to ensure the Store's smooth success. A full-time manager will operate the store daily, providing both sales help and on-site service. As time passes, little doubt remains that the Engineering Computer Store will be able to meet all of the our students' computer needs. Don't let this fantastic arrangement pass you by. Join Selby Engineering Computer Store Manager

ATHLETICS

Engineers vs. the MICE

It was Friday February 5, 1988 at 2 p.m. at Varsity Arena. It's a story of Mice and Men (men meaning men/women). If you didn't make it to the hockey game of the year, you really missed out (it was even better than seeing the Leafs win!). Our star studded cast of young men/women hockey players cast a gloom over the U of T Police Force as we slipped past them 11 to 10! Like, we should go to the Olympics, eh?

In three periods of total (like totally) excitement, the lead changed hands more than once keeping the LGMB busy playing every time someone scored. The reffing was pretty good except for a few calls where our faithful coach called the referee names in French (or I think it was French!). There were only two penalties the whole game which is absolutely amazing for non-contact hockey!

Oh, yea! We played the game for the Daily Bread Food Bank and the players, the LGMB and the fans (one or two) collected two full boxes of food for the cause. We've been challenged to a re-match already so keep your eyes open for ads and don't miss out again.

Keren Morehead

P.S. Hey Wayne....nice undies and where did you get that suit - ughhhhhhhhhhhhhhhhh!!!!!!

Hockey

Debbie Yanchula

The women's engineering hockey team is having its best season yet. The team is undefeated in the new year with a 9-1 and 6-0 win over St. Mike's. The record for the season is 5-1-1. There was an all around effort displayed in both of these games. Goals were scored by Mary Nash, Barb Smith, Yana Mladenoff and Karen Klimaszewski. With the fearless goaltending of our Keren-Karen team and the 'gelling' of the team we look forward to the playoffs. With four regular season games left, the team has secured a playoff position. A special thanks to our coaches Terry Jones and Ron Uba for their coaching expertise at the predawn hours of the morning. Any fans at our morning games would be appreciated, as well as a novelty.

Broomball

Debbie Yanchula

The engineering mostly of hockey players. With brooms and running shoes, the team took to the annual broomball tournament on January 29th at shear insanity helped the Department of Athletics ice. Careful strategy and experience behind them, Roberts Street Arena. The team win 6-0 over University College, and 2-1 over challenge.

Erindale College. The team met a team consisting of varsity hockey players in the finals. Their enthusiasm as not enough to win against these seasoned veterans. Next year, with the experience behind them, the team will be back to challenge.

Suds Managers (2)-
Responsible for running the weekly Friday afternoon SUDS Pub. This includes doing a weekly inventory of the beer locker, ordering more beer from CBS, keeping the books for the pub, providing music at the pub, and running bi-occasional events such as euchre tournaments, darts tournaments, the dating game, talent contest etc. Besides Fridays, SUDS pubs are also run every night during Godiva Week (second week in January) and several times during Orientation.

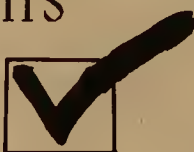

Orientation Committee
Chair - Responsible
for overseeing and

Yearbook Editor-
Edits the Yearbook.
Some experience a
definite plus but if
you're a lower year
student and this sort
of thing interests

Speaker - Being able to speak is not the only requirement of this job. A working knowledge of the fundamental rules of order (Robert's, Bourinot's) generally used for meetings is highly recommended. Previous experience running meetings is also a definite asset.

Committee Descriptions

Class Rep

- Responsibilities**
1. Check mailbox frequently.
 2. Announce events to your class.
 3. Sit on at least one committee (will be monitored).
 4. Attend all Eng Soc Meetings (Miss two and by-election held).
 5. Only Class Reps can run for Committee Chair positions.

Blue and Gold:
The Blue and Gold Chairman is responsible for running Godiva Week in January (This includes Chariot Races, Fluid Flow Labs, etc.) and also for building and organizing the Homecoming Float. You need to be a spirited, fun-loving kind of person to run for this position!

Prof. Dev.
This Committee is responsible for organizing speakers and also sends representatives to the various conferences/parties (CCES, RESSA, APEO, etc.).

The chairperson also co-ordinates OEDC (Ontario Engineering Design Competition) entrants from U of T.

High School Liaison
The chairman co-ordinates tours, Openhouse workers, and trips back to high schools to talk about U of T and Engineering.

1:10-Communications

Elections and Referendii

The University of Toronto Engineering Society's annual elections will be held on Thursday March 10 and Friday March 11, 1988, between 9:00 a.m. and 5:00 p.m. A valid Engineering Student Card is required to vote. The following positions may be contested (if more than one person is nominated for them):

President
Vice-President
Administration (V.P. External)
Vice-President Activities
Treasurer (Vice-President Finances)
Secretary

Engineering Athletic Association President

Along with the above-mentioned six contested positions, there will also be two referendums (referendii) contested at the same time. One referendum deals with the Engineering Special Fee and the other one deals with the Engineering Employment Liaison. Both of these referendii deal with YOUR MONEY so if you care about 1) how much your fees will be next year and what this money will be used for, and 2) the quality of education and services that will be available to you, then it is in your interest to find out what these referendii are about and to come out and vote and express your opinion. Detailed descriptions of both of these referendii can be found elsewhere in this Cannon.

Joint Council Meeting

The University of Toronto Engineering Society's annual Joint Council Meeting will be held Tuesday, March 22, at 5:00 p.m. in GB 202 (Council Chambers). The purpose of this meeting is to rid the society of its present crop of Officers, Committee Chairs, and Class Reps and to swear in the new batch of Officers, Committee Chairs and Class Reps. A schedule of class rep elections for all second and third year classes can be found elsewhere in this Cannon. The other major function of this meeting is to elect the appointed positions. The Joint Council Meeting should be attended by all (present and future) Officers, Committee Chairs, and Class Reps as well as anyone nominated for an elected position. Coffee and donuts will be served and attendance by all concerned would be very much appreciated.

Referendi

Notice of Referendum

Engineering Student's Temporary Educational Levy

"Do you support the collection of \$100 per year per student fee for the next two years to be used as a special educational fund which will be controlled jointly by the Engineering Society and the Dean of the Faculty of Engineering under the condition outlined in the Cannon dated Feb 5."

Yes — No —

The temporary educational levy is intended to replace, in part, the \$100 incidental fee which was disallowed by the Ontario provincial government in the summer of 1987. The conditions referred to in the referendum question are written out in the following "Proposed agreement". At present these conditions are a rough draft. The final conditions will be published in The Election Cannon which should appear early in election week. Please read the agreement and watch for more information on the implications of this levy. This referendum will appear on the ballot of the Engineering Society elections. Polls are open on Thursday and Friday, March 10th and 11th.

Proposed Agreement

Preamble

On behalf of all full-time students registered in the Faculty of Applied Science and Engineering, the University of Toronto Engineering Society proposes that a temporary Educational Levy be levied upon full-time undergraduate students registered in the Faculty of Applied Science, subject to the following eight provisions:

Provision 1

The amount of the temporary educational levy shall be \$100.

Provision 2

a) The term of the temporary educational levy shall be a maximum of two years.

b) These years shall be the academic school years of 1988-89 and 1989-90.

Provision 3

The educational levy shall be reviewed by the Engineering Society Council in the spring of 1989 and again in the spring of 1990. Review shall consist of a presentation to the Engineering Society Council of the expenditures which have occurred in the academic year.

Provision 4

Each department shall, with advice from their students, request expenditures from the Educational Levy fund

through the Dean of the Faculty of Applied Science and Engineering. Authorization for expenditures shall be made jointly by the President of the Engineering Society and the Dean of the Faculty.

Provision 5

The temporary educational levy shall cease to exist after the 1989-90 school year unless the levy is continued by an agreement of full-time undergraduate students by referendum.

Provision 6

The temporary educational levy shall be used to purchase equipment which will enhance the quality of education in the Faculty of Applied Science and Engineering above what is normally provided.

Provision 7

The temporary educational levy shall be collected by the University of Toronto with all regular fees for the 1988-89 academic school years, and shall be passed to the Engineering Society in a separate bank account.

Provision 8

The nature and implementation of this agreement is absolutely contingent upon all of the preceding provisions.

The Engineering Employment liaison referendum shall be featured on this year's Engineering Society election ballot. Polls are open Thursday and Friday, March 10th and 11th. This position was established three years ago, and is subject to review this year. The original fee was nineteen dollars and twenty-five cents. However, inflation and an increase in the responsibilities of the employment liaison have led to increased costs. Greg Gerrie, who is our present employment liaison, is an employee of the Engineering Society who works out of the career centre.

Notice of Referendum Engineering Employment Liaison Referendum

"Do you support the collection of a \$25. per student fee for the next three years for the continuation of the Engineering Employment Office which has the mandate of increasing the number of summer, permanent and Professional Experience Year jobs for U of T Engineering undergraduates?"

Yes — No —

Undergraduate Awards

The following awards are open to U of T students and may be of particular interest to Engineering students. (This is a sample of what is available, for more information see your division awards board) If you have above 70% average you stand a good chance of being eligible for an award so get out there and try.

University of Toronto Student Awards

Field of study/level: open

Conditions: To be awarded to a student on the basis of financial need

Categories of eligibility:

- war veterans and their sons and daughters
- ordinary members of a Legion and their sons and daughters
- associate members of the Legion and their sons and daughters
- Ladies' Auxiliary members and their sons and daughters
- Value: up to \$700

Donor: The Royal Canadian Legion, Ontario Provincial Command Charitable Foundation and The Ladies' Auxiliary of the Royal Canadian Legion, Ontario Provincial Command.

Application Forms: more detailed information and application forms available from the: Office of Student Awards
214 College Street
University of Toronto

Canadian Society of Exploration Geophysicists Trust Fund General Requirements: - a student must be pursuing a course of studies directed towards a career in exploration Geophysics in industry, teaching, or research. - an applicant may be either an undergraduate student whose grades are above average, or a graduate student - certain scholarships administered by the Trust Fund impose additional qualifications

To apply: Complete the questionnaire and mail to:

Scholarship Committee Canadian Society of Exploration Geophysicists Trust Fund 501,206 - 7th Avenue S.W. Calgary, Alberta T2P 0W7

Applications are available from The Office of Student Awards. Applications must be received by June 30th. Two letters of recommendation must be included, written by faculty members. A letter of reference from a past or current employer is also desirable.

SPIE Educational Grants and Scholarships

SPIE- The International Society for Optical Engineering will award more than \$58,000 in grants to educational institutions and scholarships to individual students in 1988. According to Warren J. Smith, Chairman of SPIE's Education Committee, the awards will range from \$500 to \$5000 each. Grants to educational institutions are for academic use, including student travel and equipment purchases. Individual scholarship awards are for educational purposes with final selections based upon an assessment of the student's potential contributions to optical or optoelectronic applied science and engineering. Since 1978, SPIE has awarded over \$350,000 in grants and scholarships to promote educational excellence in the fields of optical and optoelectrical engineering. Applications for the 1988 awards are available by writing to:

Mr. Warren J. Smith
SPIE Education Committee
P.O. Box 10
Bellingham, WA 98227-0010

Applications must be received by May 2, 1988.

CIM Toronto Branch Bursary Award

The Toronto Branch of the Canadian Institute of Mining and Metallurgy (CIM) is offering annually one bursary to undergraduate students from universities in the Toronto area proceeding from first year to second year or second year to third year of a mineral or earth sciences program. The bursary is for \$2,000 and is renewable for subsequent years of the undergraduate program. Renewal of the award is subject to:

- maintaining a high grade (for the year) of 70% or higher
- continued enrollment in a mineral sciences program, such as exploration geology, metallurgical engineering, mineral engineering, geotechnical engineering and mining.

Thus, a recipient entering second year is eligible for a total award of \$6,000 over 3 years.

Application requirements are:

1. a completed application form, available in the Geoengineering office Galbraith 134.
2. a letter from the applicant outlining personal experience and career objectives,
3. an official transcript of marks, including fall term, from the current school year

Deadline: March 18, 1988

Send to: CIM Toronto Branch
c/o The Secretary
111 Richmond St. W.
Suite 114
Toronto, Ontario
M5H 2G4

The Stewart Wilson Award

Applicants for the award must be registered in the first or second year of the Faculty of Applied Science and Engineering in the current session and be members of New College, either resident or non-resident. The award is of an amount sufficient to cover the annual residence fee of New College (\$3561.00 in 1986/7). The winner must proceed to the second and third year of Engineering and live in the New College Residence. Candidates will be considered with respect to the following: -academic ability, financial need, leadership qualities, and contribution to College activities. Interested students should complete the application and submit it to the Registrar, Rm. 107, 300 Huron St., by May 15. A letter of reference from a member of the University of Toronto Community must be included. (This letter should be sent directly to the Registrar from the writer).

The Toronto Business and Professional Women's Club Conditions of the award: Women who are permanent residents of Metropolitan Toronto may apply for financial assistance from The Toronto Business and Professional Women's Club Bursary Fund.

To be eligible, an applicant must be enrolled in a post-secondary or graduate educational program in Metropolitan Toronto with a view to obtaining a recognized degree, diploma or certificate. The applicant must show academic ability, financial need, and must be a Canadian Citizen or landed immigrant. Preference will be given to mature women. If a recipient is enrolled in an Engineering or technology program she will receive the financial assistance in memory of Elsie Gregory MacGill, P.Eng., a member of the Toronto Club, a highly respected consulting engineer, and a member of the Commission on the Status of Women. Applications are available from Student Awards Officers.
